

**Yes, you can.<sup>®</sup>**

**Invacare<sup>®</sup> Comet<sup>™</sup>**

**Rugged, Robust, Reliable: The Invacare<sup>®</sup> Comet<sup>™</sup>**

The **Comet<sup>™</sup>** is packed with features that enable a safe, fast and enjoyable drive. Reliability remains the hallmark of this secure and speedy scooter. Whether stocking up at the supermarket or challenging its outdoor performance, you can rely on the **Comet<sup>™</sup>** to get you where you want to go, quickly, in comfort and with peace of mind. By combining rugged outdoor capabilities with ergonomics and good looks, the *Invacare<sup>®</sup> Comet<sup>™</sup>* is a stellar solution for your transportation needs.

**NEW**

### ➤ For a safe, controlled drive

With its large wheels, a powerful motor and adjustable suspension system in both the front and rear of the chassis, the **Comet™** simply invites adventure. The **Comet™** is equipped with an electronic speed reduction feature, which automatically decreases speed when going round bends: this ensures safe, comfortable manoeuvres at all times. Intelligent electronics offer a visual and audio signal when the batteries need recharging. The unique lighting system includes an easily visible DUAL-bulb headlight, indicators that automatically switch on and off and an integrated heavy-duty brake light for safety.

### ➤ Enjoy speed, enjoy support

Offering high speeds and a large battery capacity, the **Comet™** will take you further, faster.

The **Comet™** easily tackles uneven terrain and obstacles giving you the peace of mind and ability to go anywhere and everywhere. The **Comet™** has undergone extensive testing in the German independent TÜV test laboratory and complies with the Medical Device Standards for Europe.

### ➤ Compact for convenience

Ergonomic handles help you execute precise manoeuvres in tight spaces and offer relief to hands and arms during longer trips. The adjustable tiller lever is positioned opposite the handbrake and is within easy reach. A soft, swivelling seat offers an optimal driving position and allows you to move around and enjoy activities while seated. A two-step disengaging lever protects the scooter from free-wheeling if accidentally knocked out of drive mode.

### ➤ Simplicity and ease of use

Using only quality components not only makes the **Comet™** reliable, but easy to service. Simply remove the top cover to access batteries, electronics, motor and cables. The motor and electronics are protected from corrosion and water (splash protection) which safeguard the vital workings of the scooter against dirt and water preventing any unnecessary malfunction. The lights operate in such a way that lights still function if one bulb blows.

## Features

### Finite tiller movement

Users can easily adjust the tiller with a lever to suit their individual.

### Ergonomic steering

Prevents fatigue in arms and hands during long trips.

### Hand brake

Ensures immediate braking when required.

### Brake light

Heavy-duty brake lighting warns people that the scooter is slowing down.

### Two-step disengaging lever

Prevents the scooter from accidentally free-wheeling.

### Built in anti-splash guards

Protects electronics and the transaxle from dirt and water.

### Automatic speed reduction

Speed lowers during turns to ensure a safe manoeuvre.

### Suspension

Can be adjusted at front and rear for optimal driving comfort.

## Options & Accessories

### Seat raiser

Electronically raises the seat to preferred height.

### Lockable front box

Secure box for valuables.

### Seat suspension module

For increased comfort on the move.

### Cup holder

Stores water or soft drinks.

### Heavy-duty storage cover

Keeps the scooter clean and dry.

### Off-board charging

Simply remove batteries to charge with the off-board charger kit.
